

# Photonic Insight Ltd.

## CL200 Microscope

### KEY STRENGTHS:

Hand Held Fiber Microscope is used for inspecting fibre terminations providing the most critical view of fibre end faces. Coaxial illumination (CL) produces excellent detail of scratches and contamination with its good optical performance and integrated laser safety filters. It is the clear choice for critical examination of polish quality.

**Features:** This device is very effective, reliable, easy and safe to use.

- **With CE APPROVAL**
- LED illumination
- Clear bright images
- Smooth focus control
- Momentary push button on/off switch
- Laser filter installed for eye protection but this should never be relied upon for complete safety.
- It comes with a universal adapter (2.5mm) and compatible with ST, FC, SC, E2000, and 2.5mm DIN

### Specifications:

- Rubber Housing: Anti Slip
- Optical Magnification: 200x
- Power source: 3 x AAA batteries, included
- Light Source: White LED, rated for 100,000 hours
- Weight : 0.5 Kg
- Size : 225mm (8.76") L x 32mm (1.25") Diameter
- Controls: Momentary on/off switch for light source, Fine Focus control wheel
- Safety Filter: Built in IR filter Adapter Interface: User interchangeable adapters

### Accessories included:

- Soft Carrying Case
- User Manual

### Warranty: 2 years warranty

Our products are manufactured under the strict quality control guidelines established by EN ISO9001-2000 Standards
